

THE BEE.
OR NOT TO BE.

The smartest sample preparation by fusion for XRF, AA and ICP analysis!

This innovative electric fusion instrument brings a new level of performances to make fusions of cement, iron ores, ferroalloys, pure metals, refractory materials, mining samples and samples containing volatile elements like sulfides, fluorides and alkali metals.

*Expect
the best!*

It guarantees easiness of use and installation, minimum maintenance, high reliability, reproducibility and **perfect** control of fusion temperatures. An Ethernet connection allows TheBee to be controlled by a computer and be a part for automation.

How could you ask for more! Claisse establishes the standard in fusion. Our commitment is to provide 100% satisfaction level to our customers. Our friendly approach and our outstanding services are *our distinctive identity*.
